CHRISTOPHER J. PALERMO

CHRISTOPHER J. PALERMO is a native of the "Silicon Valley" area of California, USA who has worked in the intellectual property law field for 30 years.

He holds an undergraduate degree from Loyola Marymount University of Los Angeles, California and a doctorate degree in law from the University of California, Hastings College of the Law, San Francisco, California.

He worked as a computer programmer as a secondary school student and during university years, working in the C language on large-scale voicemail systems and military computers.

From 1989 to 1995 he was a patent litigation attorney in private law firms focusing on federal court motion practice and discovery.

From 1995, after an interview with Steve Jobs, to 1997 he served as Associate General Counsel, NeXT Software, Inc. prior to its acquisition by Apple Inc.

He co-founded **Hickman Palermo Becker Bingham,** LLP in San Jose, California in 1999 and has practiced patent law there for the past 20 years. His clients range from start-up entities to large companies, in fields including artificial intelligence and machine learning, network security and encryption, agricultural equipment, payment processing, expense management systems, collaborative document management and automated meal preparation. He is involved in patent risk analysis, freedom-to-operate studies, and opinions. He often works with early-stage companies to define patent strategy, select inventions for the patent process, and to address trade secret, privacy and inventorship issues.
